Wholesale Price List for 1910

LAPORTE NURSERY

LaPorte, LaPorte County, Indiana

LOCATION: Fifty miles east of Chicago, on Lake Shore and Michigan Southern, Lake Erie & Western, Pere Marquette and Louisville, New Albany and Chicago railroads, United States and American Express Companies.

GUARANTEE: We warrant our stock to be true to name, but if by mistake any should prove otherwise, the understanding and agreement is that we will replace them free of charge or refund the purchase money.

TERMS: One-fourth cash when order is booked, balance before shipment except to the trade the usual time will be given responsible parties. 50 at 100 rates; 500 at 1000 rates. Orders amounting to \$10.00 or more at lowest rates quoted, regardless of number of each kind wanted. A good discount to the trade and special prices on large orders, in lots of 5000 or more of a variety. Send your list to be figured on.

Phone 15, Long Distance.

D. J. HENRY, Manager.

TESTIMONIAL:

LaPorte, Ind., Dec. 31, 1909.

Dear Plant Buyer:—This small salesman of mine has gone forth on its mission, this is the 18th year. Each year it sells more plants. Why? Because it is an honest salesman. It has friends in every community into which it has made its annual visits. It can tell of thousands of pleased customers. It has no "fake schemes" to sell plants. But HONEST goods at HONEST prices.

I could fill all its pages with testimonials from pleased customers, as a great many do, with no P. O., but that is a part of the schemes. I refer you to any bank, express agent or business man of LaPorte as to my reliability, and business standing.

Yours truly,

D. J. HENRY.

CERTIFICATE OF NURSERY INSPECTION:—No. 64, date of issue August 25, 1909. This is to certify that the Nursery Stock and Premises of The LaPorte Nursery situated in LaPorte, Ind., have been inspected by the State Entomologist according to the provisions of the law, approved March 9, 1907, and found to be apparently free from San Jose scale or other destructively injurious insects or fungus enemies. This Certificate covers only strawberries, raspberries and blackberries. FRANK N. WALLACE Deputy in charge, State Entomologist, Indianapolis

REFERENCES: State Bank of Indiana, LaPorte, Ind. W. D. Spore, Agent United States Express Company, LaPorte, Ind.

Send me a list of your neighbors who might be interested in getting one of these price lists. For a list of 10 to 15 actual fruit growers, no others, I will send 6 plants of any variety of Strawberry or 25 if accompanied with an order.

5,000,000 Plants for Spring of 1910.

Best Stock for Least Money.

STATEMENT

To My Old Customers and New Friends:

You will notice I have discontinued the quoting of fruit trees. I am out of the tree business, and shall in the future devote my entire time to the growing of "the best plants for the least money" of any one in the business.

The greatest prejudice I have to overcome from new customers is, as one man from Illinois once wrote me, "the insignificance of your catalogue." If you want to pay for pictures and red and yellow ink, it is your privilege to do so. There is not a neighborhood in the central western states that my little price list has not visited some time during the past 18 years. If you receive one of these lists and want to know who he is, perhaps some of your neighbors can tell you.

I do not run any pedigree or patent medicine schemes, but business plants for the business plant grower to make money out of.

You will notice that I do not advertise the newest and the greatest berries on earth at the highest prices.

If you receive one of these lists, are in need of plants, write me just what you want to plant, the number and the kind of soil and I assure you it will give me pleasure to correspond with you and assist you in getting the best variety for your location and the use you want to make of it. I can make you prices on from 25 up to 100,000. I sold one man last spring in Wisconsin 450,000 plants.

No order is too small or too large for me to figure on.

Having no tree orders to look after, I will promise you to get your order off very promptly.

This past season has been one of the best we have had for raising plants. My plants are stronger and better than ever before, and would give the best satisfaction. However, this condition is not the same over the whole country, for in parts the past summer it was exceedingly dry, and the plants will be scarce. The demand will be heavier than ever and my plants will run out long before the season is over. I advise all old customers and prospective ones to place their order early. I always find the early buyer, while the varieties are all in stock, the satisfied one.

SEND IN YOUR ORDER EARLY.

The plant grower that also makes a business of growing berries for the market knows better what his customers need, than one who raises part of his plants, and gets most of them from his neighbor growers. There are such men in the business and the planter wants to look out for them.

I can refer to regular customers who buy strawberries from me one year after another. Dreager Bros., Commercial Ave., South Chicago, have bought from \$500 to \$800 worth of berries from me every season for the past 14 years. This shows that I do not run out of good plants to fill orders with. I plant beds, or acres that I intend for plants, and those intended for berries. The plants come from the same plant beds, but the late care of them is a little different. You can see at once the practical side—the plant grower and the berry grower. Ask any customers of mine in Chicago, Indiana Harbor, or LaPorte, who raises the largest and finest berries that come to market, and it is HENRY'S. Why? Because I give the soil and plants more care than the average grower,

There are about 15 varieties that are business plants for the business grower; outside of these it is experiment. You will find most of these indicated in the following list. An acre of good plants will turn off about 100,000 plants. This acre of plants is worth to me in berries \$300.00. You see it is no money to me to sell plants at \$1.50 to \$2.00 per 1000. They can only do that on land that is so poor that it will not mature the berries in a marketable condition, and that being the case the plants are not in a "plantable" condition. No roots. No crowns, or no vigor. Look out for the \$1.50 and \$2.00 man, if his plants are any good they are worth more for berries, and every good berry grower knows that to be a fact. There are some loose sandy soil where the plants crowd together and form spindly plants that produce 200,000 per acre, but these plants are high at any price.

My Plants are all from new beds, and no plants are allowed to catch after Oct. 1st; the whole row is taken up by the diggers in the field and immediately shook out, sacked and hauled to the packing shed where they are cleaned of old runners and old leaves, straightened out and tied in bunches of twenty-five. The orders for a day's work are selected in the morning and they are put up and packed out that night. No plants are left in the packing house from day to day. Plants are not put up ahead to fill orders with; each order is freshly dug and shipped the same day in light slat crates or baskets with plenty of moss to carry them safely to any part of the United States or Canada. Give me a trial order this year. Satisfaction guaranteed.

Thanking all my old customers for past favors and assuring them that I appreciate their trade, and any favors they may extend me, and guaranteeing both new and old that I will please them the coming season.

Strawberry Plants

Pistulates Marked P.

21 VARIETIES—Old standard kinds. Wilson's Albany, Downing, Saunders, Cyclone, Greenville, (P), Michigan, Dayton, Belle, VanDiemen, Enhance, Eureka, (P), Cumberland, Barton's Eclipse, Beverly, Margaret, Dew, Brunette, McKinley, Seaford, Cobden Queen, Bismark, Earliest, Kansas, W. J. Bryan \$ 30 \$ 40 \$3 00

Send in your orders early while the list and varieties are full. I have a large supply of Warfield, Dunlaps, Gandy, Harverland, Aroma, Bubach, Etc.

AROMA—A medium late berry far superior to Gandy in quantity and quality, very productive, large size and all right every way, more planted than any other late variety.... 50 50 4 00

AUGUST LUTHER—I picked berries as early as from Michael's and is far superior to that variety for an early berry 30 50 3 50

BEDERWOOD—A beautiful round berry. One of the best fertilizers. The plants will stand more freezing than any plant on the list. Just the berry for the far north, and good enough for any country 30 50 3 50

BRANDYWINE—The plant that produces the most fall berries, when burned off and renovated, of any variety. It is a good producer during a long season, and of excellent quality 30 50 3 00

BUBACH NO. 5 (P.)—Old standard sort. Large and fine. We picked crates of them last year, 15 to 25 berries per quart. This is one of my market varieties and brings good profit. 30 50 4 50

BUSH CLUSTER—As its name implies, grows in large clusters and is an excellent variety for hill culture. The berry is all right as to color, size and quality 40 80 4 00

CLYDE (S.)—This is the most productive variety yet introduced. It is a favorite with me and is always in my market list. I picked last season at one picking 21 crates from three rows 30 rods long. The only trouble with the Clyde is that it sun scalds. This can be avoided by heavy mulching. Put on plenty of straw and leave it on and Clyde's will make you more money than any two varieties in the patch 30 50 4 00

CLIMAX—This is the best early variety now on the market. A good size, good color and very productive, which most real early berries lack. If you want an early variety for home market, you can make no mistake in planting Climax 40 50 4 00

CRESCENT (P.) 25 50 2 50

ENORMOUS—As its name implies, it is very large and a good producer 30 50 4 00

EXCELSIOR—This variety is very productive. It is rather small in size, but its earliness makes it a valuable berry. As the early bird catches the worm, so the first berry on the home market catches the big prices, and to do this, plant Excelsiors and Climax on a south sandy slope, and you will be the first on the market in any locality in the United States 50 50 3 50

GANDY —Having planted Climax and Excelsior for early, now plant Gandy for the late market. The time to sell berries is when there are not many on the market, and the late berries always bring a high price. My Gandys, Klondikes and Rough Rider brought me \$2.50 per 16 quart cases this season. Gandys are large, fine color, and demand the highest prices	Pr 25	Pr 100	Pr 1000
	30	50	4 00
GLEN MARY (P.) —A very large berry and plant. A healthy grower. It has many of the good points of the Bubach. It always finds a place in my berry field, as it is a profitable market variety	30	50	4 00
HAVERLAND (P.) —I said last year that this old standby was a mortgage-lifter. That was several years ago. This year it helped to life a new house with all modern improvements into existence. The Haverland has made me more money than any other variety except the Bubach. The berry is long and good color and very prolific	30	50	4 00
JESSIE —One of the old varieties that still is a favorite on account of its large size and good color. It is one of the best for a fertilizer. A prolific bloomer	30	50	4 00
JOHNSON'S EARLY —The largest of the early varieties and I believe the best. I am sure you will make no mistake in planting it for an early berry	30	50	3 50
KLONDIKE —When you see a berry quoted on the Chicago market, plant it. It is a favorite. It is very large, dark red, and one of the latest. Klondike, Gandy and Rough Rider all find a place in my berry field. If you do not have this variety, plant some now	30	50	4 00
KITTY RICE (P.) —After three years of fruiting, I find no fault wlith Kittie. If she cannot catch mice, she does catch dollars by her beautiful color, fine quality and large size. I do not think a more perfect berry grows	40	50	4 00
LOVETT'S EARLY —A good fertilizer for all pistulate berries. A good sized berry, which hold on to the last of the season; when you want just a few berries to fill out a box you will always find them here	30	50	3 50
LOUIS HUSBACH —I have not fruited this variety, but can furnish a few plants if you desire to try them	40	50	4 00
LESTER LOVETT'S —This variety has done excellent the past three years. It is very large, a good color, and a very strong grower. It is quite late and is worthy of a trial ..	60	50	3 50
MARSHALL —The plant is a strong grower, quite prolific. The berries are handsome and very large. A good variety for a fancy market	30	50	4 50
MILLER —Has many of the characteristics of the Bubach; only a perfect variety. Large plant, dark green foliage and large fine berries. Give it a trial	50	50	4 00
MISSOURI —We all realize that Missouri is all right, and as we now have a berry named after that good state, we should all give it a trial. Large, dark red, productive, perfect in blossom and make-up, and like the Ben Davis apple, a money maker	40	50	4 00
MICHAELS E.	25	50	2 00
MONITOR —	25	50	3 00
MARIE (P.) —Fruit large, dark red flesh; makes plenty of plants and a good crop of berries	40	50	4 00

NICK OHMER —A mid-season berry of extraordinary size, and quality the best	Pr 25	Pr 100	Pr 1000
	30	50	4 00
OOM PAUL —A very strong plant-maker, stocky and heavy set, and produces a very fine berry, showy and solid. One of the best new acquisitions to the berry calendar	40	50	4 00
PARSON'S BEAUTY —Next to the Warfield the best canner on the list, and one of the most profitable berries to plant. Good size, shape and color and very productive. If you get a start of them you will never discard them any more than the Warfield	40	50	4 00
POKEMOKE —A good berry to plant and should be on your experimental list	40	50	4 00
PRIDE OF MICHIGAN (BALDWINS) —Fruit medium to large, of a dark, glossy red color. Good plant maker and stands drouth better than most kinds	50	75	6 00
PARKER EARL —This grand old berry is still a favorite with me and always does its duty at picking time	30	50	4 00
ROUGH RIDER —I was better pleased with it than in former years. It did splendid last season and is an extra fine berry and quite late. Its large size and beautiful color makes it very attractive and it sells well. It is always found in my late berry fields	30	50	4 00
RIDGEWAY —This is one of the prettiest berries grown. Smooth and glossy, large size and handsome	50	50	4 50
SHARPLESS —Still a favorite among a great many growers on account of its large size, odd shape and mild flavor	30	50	4 00
SPLENDID —I can recommend this berry to be as good as its name, good size, shape and color, and healthy in foliage, and prolific. Those who know it like it very much	30	50	4 00
SENATOR DUNLAP —If I could only plant two berries they would be Warfield and Dunlaps. Brother and sister and twins at that. You can make no mistake in planting Dunlaps. A beautiful dark berry, good size and fine quality. Dec. 10th, 1909, I have inquiries for one-half million Dunlaps to date. Plant Dunlaps	30	50	3 25
SAMPLE (P.) —One of the late varieties that produces a large crop of berries. It is a beautiful dark red, large and perfect in shape. You never find an ill shaped Sample. It is as large as the Clyde and almost as prolific. If you want a fine berry to eat or sell, plant Samples. My berry field would be a failure without Samples. Remember, I am a berry grower as well as a plant grower, and you can rely upon my personal statements about varieties. Be sure and plant Samples	30	50	3 50
SUNSHINE (P.) —A new late kind, is worthy of a trial as a late berry	30	50	3 00
THE CHALLENGE —Proved to be a very good berry, large and good color	50	60	5 50
UNCLE JIM —There is no larger berry grown than Uncle Jim. It is a dark, crimson and very showy. Pickers like to get on Uncle Jim rows, as it only takes a few berries to fill a box. It is very prolific, and long season. It will make you lots of dollars	50	60	4 25
WARFIELD (P.) —No berry field is complete without Warfields. It is a deep red and very prolific. It is the family berry, and all berry growers use it for table use and canning. It is mid-season and holds out to the last. I sell			

more Warfields and Dunlaps than any other ten varieties. The plant is small, but of great vitality. Its greatest fault is making too many plants. They should be thinned Pr 25 Pr 100 Pr 1000 out in the fall 30 40 3 00

WM. BELT—A good fertilizer. A dark red berry of large size, and a great favorite with many planters 50 50 3 50

Red Raspberries

CUTHBERT—Of all the new Red Raspberries introduced, none takes the place of the Cuthbert, “the Queen of the Market.” It is healthy, good color and easy to pick. It is solid and carries well to market \$ 25 \$1 00 \$8 00

LOUDON—A beautiful dark red, and much later than the Cuthbert 60 1 50 12 00

MILLER’S—Very early. A good color, and on account of its earliness is a profitable variety to plant 50 1 00 8 00

EARLY KING—About the same season as Miller’s. A rank, strong grower, and free from diseases 1 00 1 50 12 00

THOMPSON E.— 25 1 00 8 00

Purple Raspberries

COLUMBIA—The “Gem” of all Purple Raspberries. I grow them for market, and find them solid and very prolific. It is the only raspberry we use for family use, table or canning. Purple Raspberries are freer from seels than any other kind 60 1 50 14 00

SHAFFER’S—This is the oldest Purple Raspberry put on the market, and it holds its own against all newcomers. It is prolific and a good market variety 50 1 50 14 00

HAYMAKER—Between you and I, I prefer the Columbia to this variety, although it has many good qualities, and is worthy of a trial 1 00 2 00 16 00

Black Cap Raspberries

CUMBERLAND—This variety is still at the head of the list of Black Caps. The largest, the best color, the most productive, the hardiest. It makes me more money than all other varieties. It carries well to the market and sells at the highest. I have a large supply of first class plants and have made the prices to suit all. **ORDER EARLY.** The only variety that was not affected by October, 1906, freeze. With me in this northern locality it seems to be winter proof 50 1 50 12 00

KANSAS—A great favorite in many parts of the country. A very hardy cane and productive berry. Good heavy plants 50 1 00 8 00

OLDER—For family use the best of all B. C. Very few seeds and a delicious flavor. A great favorite in the extreme north and northwest on account of its great hardiness and productiveness 50 1 50 12 00

GREGG—The old standby has made more money for the fruit grower than all other varieties. A large berry of the largest size, and the best shipper 50 1 25 9 00

PALMER—One of the earliest and sweetest of the B. C., the first on the market and holds to the end of the season 50 1 25 8 00

EUREKA—An early variety of the first quality. Large, prolific and solid. A good shipper 50 1 25 10 00

NEMAHA —Has many of the characteristics of the Gregg. Pr	25	Pr 100	Pr 1000
Large, solid and a late variety	50	1 50	12 00
GAULT EVER-BEARING —This variety keeps sending out new shoots and producing berries until late in the fall. Should be in every garden	50	2 00	12 00
MUNGER —	1 00	2 00	18 00

Blackberries

SNYDER —This old standby variety was originated in LaPorte County, Indiana, over 50 years ago. Old settlers point out where Mr. Snyder planted the first plants. My plants come from the original stock. Many growers have what they call Snyders, but they are not. The berry is large, glossy, black color, and will stand any degree of freezing.	50	1 25	10 00
ANCIENT BRITON —I am still of the opinion that this is the best late berry for the farm and market. Yields the most per acre and sells the highest. It is free from disease and will not freeze at 40 below zero	50	1 50	14 00
ELDORADO —The demand for this grand blackberry always exceeds the supply. You make no mistake in planting Eldorado, for home use or for market.....	1 00	2 00	18 00
EARLY HARVEST —A good variety	50	1 25	10 00
BLACK BEAUTY —Extra early, very large, rank grower. My introduction. Fifth year on the market. A very few plants to sell. If not satisfied money refunded	1 00	3 00	

Currants

POMONA —The only currant that produced fruit last year on my farm. It is as large as Fay's and 100 per cent more prolific. For market it is just the variety. Currants are a prolific crop to raise, and the Pomona is the best grown	1 year	1 75	4 50	40 00
	2 years	2 00	6 00	50 00
FAY'S PROLIFIC —An old variety of great merit. Very large	1 year	1 75	4 50	40 00
	2 years	2 00	6 00	50 00
WHITE DUTCH, VICTORIA, RED CROSS, NORTH STAR —These are all fine currants, and do well in any soil or climate	1 year	1 50	4 50	40 00
	2 years	2 00	6 00	50 00

Gooseberries

DOWNING —The best market varieties, free from disease and mildew. A large berry and good color and great yielder	1 year	1 50	8 00	
	2 years	2 00	10 00	
SMITH and HOUGHTON	1 year	1 50	8 00	
	2 years	1 75	10 00	
INDUSTRY, KEEPSAKE, PEARL and CHAUTAUQUA . 2 years		4 00	20 00	
RED JACKET (or Joscyln) —The berry, when ripe, is dark red, very large and good to eat from the bushes. The best table variety. Is very hardy and productive	1 year	2 00	9 00	
	2 years	2 50	10 00	

Asparagus

PALMETTO, CONOVERS, BARR'S MAMMOTH, COLUMBIAN, ELMIRA	1 year	50	75	5 00
	2 years	1 00	1 00	6 00

Grapes

CONCORD —The old reliable standby. A blue grape of great merit				
1 year	Pr 25	Pr 100	Pr 1000	
2 years	1 00	2 50	20 00	
	1 00	3 00	25 00	
NIAGARA and MOORE'S DIAMOND —The two best white grapes on the market. Hardy, good quality and productive				
1 year	1 50	5 00	40 00	
2 years	2 00	6 00	50 00	
MOORE'S EARLY and WORDEN —These varieties are blue, early and of the best quality				
1 year	1 50	4 00	35 00	
2 years	2 00	5 00	45 00	
AGAWAM, CATAWBA, DELAWARE —The best red varieties, and should be in every garden				
1 year	1 50	4 50	40 00	
2 years	2 00	5 00	45 00	

Roses

A Rose given with each order for plants at list price that amounts to \$2.00 or more. Ask for it.

SPIREA, VAN HOUTTE	50c each		
HYBRID PERPETUALS —These are varieties that are very hardy, and will stand the winter in almost any part of the U. S. Roses should be found in all fruit gardens, and no yard or lawns are complete without them.	Each	Per 10	Per 100
	25	2 00	15 00
PINKS —The very best are Mrs. J. H. Lang, Paul Neron, Magna Charta, etc.	25	2 00	15 00
RED —Gen. Washington, Alfred Colcomb, Gen. Jack, Dinsmore and American Beauty, etc.	25	2 00	15 00
WHITE —Coquet, Des Blanche, Margaret Dixon and Coquet Des Alps. I will guarantee all the above varieties. Two year old field grown plants	25	2 00	15 00
CLIMBERS —Anna Marie, Prairie Queen, Seven Sisters and Baltimore Belle. All good, hardy roses for the porch or trellis, 2 years old	25	2 00	15 00
RAMBLERS, Crimson Ramblers and Dorothy Perkins —No porch is complete without this beautiful adornment. Plants two years from setting have had as many as 800 roses. Money refunded if not satisfactory. Large two-year-olds, two feet long	50	3 00	25 00

Chase Bros.

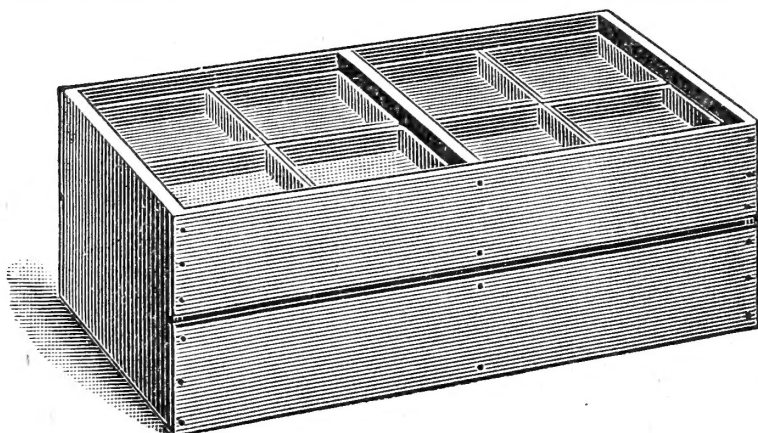

GRAND AND UPRIGHT PIANOS

Hackley Boltwood Carlisle
